Problem*

SME - Self Made Entrepreneurs

Running business is surely tough job and especially when we start on our own.

Though look small SME's participation in India's economy cannot be ignored but their problems are always sidelined. Most difficult issues are managing people. In today's world of computers everyone expect SME to computerize their business activities but when it comes to providing solution hardly any one stands by SME.

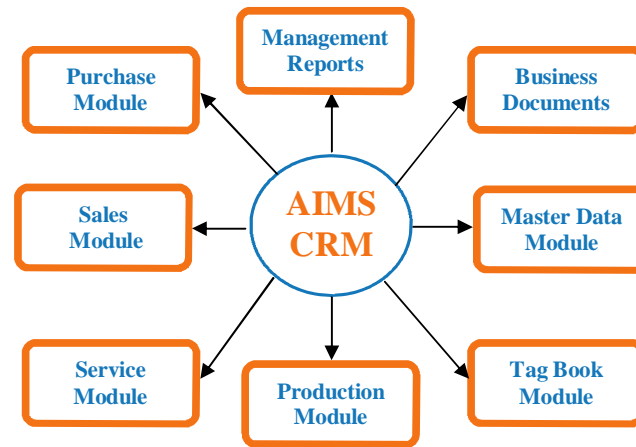

AIMS CRM – Exclusive CRM for SME!

Customer is the king of business Every organization strive to have perfect client with it. But in today's fast growing world it's hard to please the most important entity of the business. Computerization is need of today's Business era. Technology adds the value to the business by all means.

AIMS CRM – Customer Relationship Management software surely helps to improve business with perfect data analysis and management reports. CRM is extremely flexible tailor made solution to suit every business needs.

Most of SME business are quite simple Purchase, Sale, Assemble the products per client needs. AIMS CRM is designed after considering the exact business flow of SME.

AIMS CRM – Modules

Why AIMS CRM?

- 👍 **Smallest in Size, Fastest and Easiest to implement**
- 👍 **Bug free robust Business Application**
- 👍 **Environment and platform independent**
- 👍 **No maintenance at all!**
- 👍 **Simple to use , easy to understand**

Benefits of AIMS CRM Features

MultiUser LogIn With Menu Level Security

Many employees can use single software with restricted access to related menus only. Ensuring High end security for company's extremely important data.

Purchase Module, Sales Module, Service Module & Tag Book Module

AIMS CRM follows the real world business model of SME industry so easy to integrate into system. Once entered data remains forever in the system so less room for manual mistakes! Decreases human errors and adds efficiency to sales and services.

Product Assembly Module

Unique feature of AIMS CRM where product costing can be done based on the product/components available. This helps in knowing the company's status to offer its special products and services to their clients. Keeps watch on value spent on product assembly which results in better business.

Document Generation

50% of the employee's time goes in quotation and sales document generation. AIMS CRM generates document over single click of mouse. Employees simply like this as it saves their efforts and time.

Management Reports

All is well if business grows. Management Reports is such feature which eyes on the results and keeps track of the employee's performance as well as the company's business growth with extremely accurate time bound reports with facility to export to excel.
